

Golight / RadioRay Disassembly

1. Portable Lights: Pull the handle out and away from the top housing of the light. (The handle is flexible.)
Permanent Mount Lights: Using a Slot Head screwdriver, remove the screw caps or “ears” on both sides of the light.
2. Remove the (2) newly exposed Phillips screws from both sides of the light.
3. Gently push the lights lamp into a vertical position. (This will create a space for your fingers to assist you in removing the top housing of the light.)
4. Hold firmly on the base as you lift off the top housing.
